ABOUT ME

Frontend Developer with 4+ years of experience building responsive web applications and product interfaces using React.js, Next.js, JavaScript, HTML, CSS, and modern UI frameworks. Experienced in Shopify theme development, Liquid, Figma-to-code implementation, API integration, animations, and responsive UI development. Hands-on experience with AI-assisted development using Claude, Codex, ChatGPT, Fable, Higgsfield, and other AI tools to accelerate development, automation, debugging, and rapid prototyping. Also experienced in blockchain/Web3 applications, smart contract integration, real-time features, and workflow automation. Quick to adapt to new technologies and project requirements while maintaining clean, scalable, and production-ready code.

SKILLS

- **Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux, GSAP, Responsive Design
- **Shopify:** Shopify Theme Development, Liquid, Shopify Sections, Theme Customization, Storefront Development, Shopify Horizon, Shopify Theme Check
- **AI-Assisted Development:** Claude, Codex, ChatGPT, Higgsfield, Minimax AI, Lovable AI, AI Prompt Engineering, Figma-to-Code, AI Prototyping, Gemini, Perplexity, Grok, Qwen, Microsoft Copilot, Replit
- **APIs & Integration:** REST APIs, Third-Party API Integration, WebSockets, Socket.io, API Validation & Verification
- **Automation:** n8n, Groq AI, Workflow Automation, Social Media Automation, AI-based Task Classification
- **Blockchain / Web3:** Smart Contract Integration, MetaMask, Staking, NFT, ICO, DeFi, Crypto Exchanges, MLM
- **Backend:** Node.js, Express.js, MongoDB (Basics)
- **Development Tools & Deployment:** Git, GitHub, GitLab, NPM, Figma, Netlify, Vercel, Jenkins

WORK EXPERIENCE

Frontend Developer / Shopify Developer — ***May 2025 - Present***
Sportstech - Beeyoond Gaming — **Madurai**

- Developed and maintained responsive Shopify storefront pages using Liquid, HTML, CSS, and JavaScript, including new pages, sections, content, and product updates.
- Worked on bug fixes, UI improvements, and theme customization, gaining hands-on experience with Shopify Liquid files and storefront development.

AI-powered Shopify Developer Bot 🔗https://sportstech.de/

- Developed an AI-powered Shopify Developer Bot using Claude Skills to analyze and classify Wrike development tasks into code-level, Admin-side, Human-only, and Diagnosis work.
- Automated Figma-to-Shopify UI implementation and code-level bug fixes, with Git branching, Shopify Theme Check, preview QA, and approval workflows.
- Built a controlled development workflow to improve frontend development speed, consistency, and code quality while protecting production code.

AI-Assisted-Product Page Prototype | 🔗https://test-product-fable-animation.netlify.app/

- Explored the Fable and Higgsfield AI workflow to create a prototype of the Sportstech treadmill product page from a single short prompt. Used AI-generated UI, visuals, and animations to rapidly prototype a product experience and refine the output based on the required design and interaction.

AI-Powered Instagram Comment Automation

- Developed an AI-powered social media automation workflow using n8n and Groq AI to fetch Instagram comments at scheduled intervals and classify them by sentiment and topic.
- Implemented automated routing where Positive/Neutral comments receive multilingual auto-replies, while Negative/Critical comments generate draft responses for human review without automatic posting.
- Integrated Google Sheets for structured data logging and dashboard integration, capturing comment details, sentiment, topic, translations, reply content, post links, and processing status.

Sportstech NEO – Product Landing Page | 🔗https://sportstech-funnel.netlify.app/

- Engineered a high-performance, responsive product landing page showcasing crypto integration in the fitness domain using HTML, CSS, and JavaScript

Web3 Fitness Platform | 🔗https://crypto-designphase2-update.netlify.app/ , https://presale-rho-rosy.vercel.app

- Developed and iterated 3 UI versions aligned with evolving Figma designs and dynamic business requirements, ensuring rapid adaptation to product changes
- Engineered scalable, high-performance, and fully responsive interfaces using React.js, Next.js, and Tailwind CSS
- Enhanced user engagement and visual experience through smooth, interactive animations using GSAP
- Integrated newsletter subscription API with robust form validation and verification logic to ensure reliable user data handling
- Developed a static presale landing page with a responsive, conversion-focused UI, translating Figma designs into a polished frontend experience for the Web3 fitness product.

Beeyoond Gaming Website - Madurai Branch | 🔗www.beeyoondgaming.com

- Designed and developed the complete website from scratch without design references, delivering a fully functional UI using Next.js and Tailwind CSS

Beelockchain.io - Blockchain Development Website | 🔗https://beelockchain.io/

- Converted UI/UX team-provided Figma designs into responsive, reusable frontend interfaces with accurate layouts, styling, spacing, typography, and visual interactions across desktop and mobile.

Beelockchain.com - Digital Transformation Website | 🔗https://beelockchain.com/

- Implemented pixel-accurate, responsive frontend interfaces from Figma designs using Next.js and Tailwind CSS, with reusable components and consistent visual styling across desktop and mobile.

WalkingPad Vergleich - AI-Driven Website | 🔗www.walkingpad-vergleich.com

- Built a multi-page affiliate website using Next.js and Tailwind CSS, leveraging Minimax AI and ChatGPT for rapid development and UI generation. Used AI-driven workflows for site architecture, content structure, asset generation, and German localization.
- Delivered a responsive, production-ready website by combining AI-assisted development with frontend engineering expertise.

Software Programmer — ***Jul 2024 - Dec 2024***
Ultrapro Blockchain Tech Pvt. Ltd. — **Madurai**

Ultrapro Exchange - Admin Panel

- Developed and managed a comprehensive admin panel for a crypto exchange, covering financial modules such as deposits, withdrawals, staking, and transaction monitoring
- Implemented role-based access control for users and sub-admins, along with trade pair management and CMS functionalities
- Engineered real-time features including live chat and transaction updates using Socket.io, ensuring seamless communication and data flow. Integrated extensive REST APIs to enable secure, scalable, and efficient handling of financial operations

Programmer — ***Sep 2021 - Dec 2023***
Osiz Technologies Pvt. Ltd. — **Madurai**

Osiz Labs (Educational Platform) | 🔗www.osizlabs.com

- Developed responsive frontend modules using React.js, including course enrollment forms, course detail pages, and reusable dynamic UI components. Integrated REST APIs and form validation to handle course-related data, user inputs, and application workflows accurately.

My Wig (ICO Platform) | 🔗mywigfront.osiztech.com

- Developed frontend features for a blockchain-based ICO platform, integrating MetaMask wallet connectivity and smart contracts for token transactions. Implemented the token purchase and distribution flow, enabling users to connect their wallets, participate in the ICO, and complete blockchain transactions securely.

X-PET (NFT Marketplace) | 🔗xpetgame.osiztechnologies.in

- Developed core NFT marketplace functionality for buying, selling, and breeding digital assets, creating interactive and responsive user interfaces. Integrated MetaMask and smart contracts to enable wallet connectivity, transaction execution, and blockchain-based NFT operations.

Parifi (DeFi Platform) | 🔗parifi.osiztech.com

- Developed frontend functionality for staking, unstaking, reward claiming, and decentralized voting, integrating blockchain logic with the application interface. Integrated and handled smart contract interactions to enable users to execute DeFi transactions and view real-time transaction states.

EDUCATION

B.E (COMPUTER SCIENCE ENGINEERING) | Sree Sowdambika College of Engineering — ***Jun 2017 - Mar 2021***
